

OOH740-A9-Ex

Cerberus™ PRO
Collective

Multisensor fire detector

ASAtechnology™
For potentially explosive areas

- Signal processing with *ASAtechnology*
- Multiple protocol detector (collective/C-NET-Ex)
- Event-controlled detection behavior
- Early and reliable detection when fires occur
- Highly developed immunity to deceptive phenomena
- Redundant sensor system
- Suitable for wind speeds of 1 to 20 m/s
- Prepared for future requirements thanks to its programmability
- Communication via C-NET-Ex (addressed individually)
- Address automatically issued during commissioning

Properties

- **Eco-friendly**

- Environmentally friendly processing
- Reusable materials
- Electronic parts and synthetic materials can be easily separated

- **Features**

- Resistant to environment and interfering influences such as dust, fibers, insects, moisture, extreme temperatures, electromagnetic interference, corrosive vapors, vibration, artificial aerosols, and atypical fire phenomena
- Shock resistant, protection against sabotage
- Signal processing with **ASA**technology (Advanced Signal Analysis)
- Time and process-dependent detection behavior
- High degree of immunity to faults in power electronics
- Protected electronics, high-quality components
- Sophisticated sensors and electronic monitoring
- Redundant, high-quality sensor system
- Integrated alarm indicator (AI), 360° visibility

OOH740-A9-Ex neural fire detector, ASA

- **Function**

- Functions according to the scattered light principle with two sensors, optical forward and backward scattering
- Opto-electronic measuring chamber which obstructs disruptive extraneous light but provides excellent detection of both light and dark smoke particles
- Two additional heat sensors increase the fire detector's immunity to deceptive phenomena
- Can be set as a multisensor smoke detector, smoke detector, or heat detector by the software
- Selectable detection behavior thanks to application-specific ASA parameter sets
- Multi-protocol: Collective/GMT (Cerberus/Siemens), SynoLINE300 C-NET-Ex

- **Use**

- For early detection of flaming fires of solid and liquid substances as well as of smoldering fires
- For early and reliable fire detection in an environment with deceptive phenomena
- Can be used either addressed or collectively

Efficiency on-site

- Exchange the detector with detector exchanger FDUD291 without resetting the parameters
- Exchange the detector with detector exchanger FDUD291 without a ladder at heights up to 8 m

Installation

- **Easy mounting**

- Base with stilts for surface-mounted and recess-mounted supply lines
- Flat base for flush mounting, only for recess-mounted supply lines
- Extra-long mounting slits allow existing drill holes from other systems to be reused
- A large opening in the detector base makes it easy to feed the cables through
- The detector can be screwed into the base easily either manually or using a detector exchanger
- The OOH740-A9-Ex fire detector is designed in ignition protection category 'intrinsic safety' Ex i Standards IEC 60079-0 and IEC 60079-11 provide a basis

Installation in potentially explosive areas

Specific national requirements always apply when creating installations in areas at risk of explosion.

Addressed operation (C-NET/C-NET-Ex)

The safety barrier FDCL221-Ex ensures electrical isolation of the potentially explosive areas and the areas not at risk.

- 1 FDCL221-Ex line adapter (Ex)
- 2 Manual call point FDM223-Ex
- 3 Multisensor fire detector OOH740-A9-Ex
- 4 Alarm indicator FDAI92-Ex
- 5 Alarm indicator FDAI93-Ex

Collective Ex installation

The input/output module DC1192/FDCIO223 with downstream safety barrier SB3 ensures electrical isolation of the potentially explosive areas and areas not at risk.

- 1 Input/output module DC1192
- 2 Transponder FDCIO223
- 3 Zone module FDCI723
- 4 Equipotential bonding ground
- 5 Alarm indicator FDAI92-Ex / FDAI93-Ex
- 6 End-of-line EOL22(Ex) in the last detector
- 7 Heat detector DT1101A/02A-Ex
- 8 Multisensor fire detector OOH740-A9-Ex
- 9 Smoke detector DO1101A-Ex
- 10 Safety barrier SB3

Dimensions of the detector with base

up to Ø6 mm possible for surface-mounted cable entry with base FDB221, FDB201, or FDB202

with base FDB222 for flush mounting, only for recess-mounted cable entry

Technical data

Dimensions (Ø x H)	100 x 45.7 mm															
Operating temperature	-25...+70 °C															
Storage temperature	-30...+75 °C															
Air humidity	≤95 % rel. (short-term moisture condensation permitted)															
Communication protocol	C-NET or collective Ex															
Color	~RAL 9010, pure white															
- Protection category according to EN 60529	IP43 IP44 with sealing kit FDBZ295															
Collective system compatibility	FC10, XC10, FC330A, FC700A															
C-NET system compatibility	FS720

Disposal

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
